

Low Cost Microsoft Licenses

TCS has a Volume License Agreement with Microsoft that entitles students, parents and staff to purchase Microsoft software and licenses at a substantial discount through our distributor, CDW-G.

Please follow this link: <http://cdwg.onthehub.com>

Next, select the following:

- Institution Type: **K-12**
- Country: **United States**
- State/Province: **GA**

Then scroll down the list of schools to the **first** listing for **Cottage School**, and you will see all of the available software.

- Office 2010 Professional includes: Word, Excel, Powerpoint, Outlook, Publisher, Access and OneNote. Cost for **download** is about \$72 (retail is almost \$400).
- Windows 7 Professional Upgrade is also about \$71, but I would recommend spending the extra \$10 for a DVD disc to install from.
- Windows 7 Ultimate DVD is only \$92... retail is over \$200!

You will have to provide evidence of your child's enrollment in the school. This can be their ID card or a copy of their schedule or transcript.

Thanks,
Samuel W. Little
